

Testing Solutions

Automated Testing Blue Yonder Accelerator Pack

Tryon + Tricentis

We strongly advise pairing our WMS professional services with our world-class automated testing offerings powered by Tricentis TOSCA. Many of our solutions engineers double as test automation experts and can help prescribe the right low-code solution in the Tricentis suite for individuals and teams that want to regularly regression and/or performance test their supply chain systems.

BlueYonder Accelerator Package

We are excited to offer customers a test automation accelerator pack which includes a suite of pre-written automated tests to be used as part of your new implementation or an ongoing risk management strategy. These tests validate critical warehouse operations like picking, shipping and receiving in Blue Yonder WMS and are ready to be tailored for your specific WMS environment, providing you with a simpler and faster solution to conduct complete regression testing of hot-fixes, patches, mods, and upgrades.

Key Benefits

Labor Savings

Reduce Risk

Accelerating Delivery to SAP S/4HANA

THE SAVINGS

Usual business risk coverage with Tosca	38% 75%
---	------------

Usual testing cost with Tosca	\$44,030,954 \$18,539,370
-------------------------------	------------------------------

Speed to market	+759%
-----------------	-------

ROI with Tosca	+58%
----------------	------

Break even period	6 Months
-------------------	----------

THE SITUATION

- Massive SAP/S4HANA transformation project. Tyson had 2% test automation rates with over 350+ licenses of HP and Worksoft
- Expanding, complex infrastructure of shared system components with SAP
- Become more Agile and DevOps focused

THE NEED

- Implement an easy-to-use test automation for their SAP transformation
- Dramatically speed up the delivery of software
- Increase test coverage
- Goal to deliver test data to the teams at a much faster rate
